DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment After Final, filed 12/22/2004, with respect to claims 1-6, 18-23 have been fully considered and are persuasive. The rejections of these claims are withdrawn.

Allowable Subject Matter

2. Claims 1-16, 18-23 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art of record fails to teach or fairly suggest the combination of all limitations required in claim 1 that includes "...a first counter which counts a number of overexposed parts of said digital output; a second counter which counts a number of underexposed parts of said digital output; a plurality of threshold detectors for *comparing counting results of said first and second counters with desired thresholds; a decision element, which is capable of making a decision to either increase an a next frame of exposure of said image sensor or decrease an a next frame of exposure of said image sensor based on a relation with said thresholds.*"

Regarding independent claim 14, the prior art of record also fails to teach or fairly suggest the combination of all limitations required in claim 14 that includes "...an image sensor,

Art Unit: 2615

including a plurality of *adjustable photoreceptors*, each photoreceptor defining a pixel of the image, and said image sensor having an adjustable exposure which when increased, increases an amount of exposure for *a next frame of the image*, and when decreased, decreases an amount of exposure for *a next frame of the image*;...; a pixel characterization element, representing certain *most significant bits of at least a plurality of said digital outputs*, to thereby characterize said pixel according to its exposure characteristic; a counter element, which counts numbers of pixels characterized by said pixel characterization element and compares said count with certain *thresholds*; and an image adjusting element, for adjusting said exposure *based on said count*.”

Regarding independent claim 16, the prior art of record also fails to teach or fairly suggest the combination of all limitations required in claim 16 that include “...*setting a first variable threshold for overexposed pixels; setting a second variable threshold for underexposed pixels; characterizing said digital values by obtaining only a number of most significant bits of said pixels and not all bits of said pixels and investigating said most significant bits to determine if they represent overexposed pixels, normally-exposed pixels or underexposed pixels; counting said characterized digital values; and if the number of overexposed pixels is greater than said first threshold, then decreasing an exposure for a next frame and if the number of under exposed pixels is greater than said second threshold then increasing the exposure for the next frame*.”

Regarding claims 2-13, these claims are either directly or indirectly dependent of claim 1.

Regarding claim 15, this claim is dependent of claim 14.

Regarding claims 18-23, these claims are either directly or indirectly dependent of claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
